DIGI-WAVE™ WIRELESS INTERCOM SYSTEM

new!
Enhanced security
features on the
DLT 100!

[HANDS-FREE, PUSH-TO-TALK COMMUNICATION FOR

ANY SIZE PRODUCTION CREW]

NEW This simultaneous, two-way, wireless intercom system works well in an event-production scenario -- allowing producers/directors to communicate immediately and accurately in full-duplex mode with crew members in different house locations. The director and assistant director can speak simultaneously, while crew members can hear both the director and assistant director. Crew members

can participate as listen-only or can access two-way mode with the quick push of a button. The director has priority and controls the discussion. This system in the 2.4 GHz band offers a patented, frequency-hopping technology for low-noise, crystal-clear audio and less interference from other products.

DWS COM 6 PRO

DIGI-WAVE™ WIRELESS INTERCOM SYSTEM
